

# SMART, SECURE & STREAMLINED PARKING SOLUTIONS

Flash Parking Solutions

**FLA**  **H TECH**

**Flash Parking brings order to multi-level parking with a smart management system that supports businesses of all sizes — complete with an online booking system accessible from anywhere, anytime.**

Flash Parking is a complete parking management solution designed for businesses of all types—offices, malls, hospitals, apartments, and more. Based in Nepal, it offers both online and offline parking management systems, making it adaptable to various environments and connectivity conditions.

Whether it's a tenant with a reserved space or an outsider customer looking for a quick spot, Flash Parking streamlines the entire process. It helps track and manage parking records efficiently, reduces wait times, optimizes space usage, and boosts productivity by saving valuable time. For malls and commercial centers, this means better space utilization and increased footfall through a smoother parking experience.

## FEATURES

### User & Role Management

#### **-Add Members**

Flash Parking Software allows you to effortlessly register users who want to become parking members. With our system, you can assign vehicle details, select flexible subscription plans (daily, monthly, etc.), and enable seamless, contactless access via RFID or QR code. Members enjoy reserved slots, online booking, customizable shift timings, and automated renewal reminders — all managed from one centralized platform.

#### **-Add Duty User**

Assign users to specific duties based on shift schedules. The system allows you to manage staff responsibilities, ensuring the right person is on duty at the right time. Easily track shift assignments, monitor attendance, and streamline operations for optimal efficiency.

#### **-Add Tenants**

Easily register and identify tenants using assigned parking spaces in residential or commercial properties. The system allows you to link vehicle details, allocate fixed slots, define rental terms, and monitor payments. It ensures only authorized tenants have access, making recurring parking management more secure and efficient.

#### **-Menu Permission Rights**

Control access to various features and menus within the system by setting permission rights for different users. Customize user roles and ensure that each user has access only to the functions they need, enhancing security and streamlining workflows.

### Master Settings

#### **- Vehicle Category Master**

Create and manage vehicle types such as two-wheelers, four-wheelers, or custom categories. This helps in organizing, tracking, and applying specific pricing or rules based on vehicle type, making parking operations more accurate and efficient.

#### **-Shift Wise Price Master**

With Flash Parking, you can define and manage parking rates based on different time shifts—morning, evening, night, or custom time slots. This allows for flexible pricing structures tailored to demand, ensuring accurate billing and optimized revenue.

## FEATURES

### Reports

#### **- Fine/ Manual Charge**

Allows operators to issue a fine token for lost parking slips by manually entering vehicle details and applying a fixed or custom charge, ensuring smooth operation and proper record-keeping.

#### **-Subscription Expiry**

This feature helps manage parking subscriptions by automatically notifying users about upcoming renewals and alerting the admin with a list of members whose subscriptions are about to expire or have already expired. It ensures timely communication, smooth renewal tracking, and efficient subscription management.

#### **-Real Time Parking status**

This feature provides live updates on parking slot availability, allowing both users and administrators to view which slots are currently occupied or available. It ensures efficient space management and helps users quickly find vacant spots.

#### **-Employee Attendance Reports**

This feature tracks employee attendance, updates the admin on shift details, and calculates salaries based on attendance data. It streamlines payroll management and ensures accurate reporting of work hours and wages.

### IRD (inland Revenue Department) REPORTS

#### **- Sales Vat Register /Sales Return Vat Register**

Flash Parking provides a Sales VAT Register and Sales Return VAT Register, commonly known as Annex-7, ensuring compliance with the reporting format required by Nepal's Inland Revenue Department (IRD)."
